DNDs DataMaster

Privacy Policy

Introduction

Here at DataMaster, your privacy is of highest priority. We do all that we can to ensure complete confidence of all data marked as such. We appreciate your trust in our company.

Personal Information We Gather

Since we would like our customers to get right to business, with minimal worry about security and privacy concerns, we require a limited amount of personal identifying and personal information. We require a username, email, and password to create an account. If you are working on DataMaster through an organization, we will require and organization identifier as well. DataMaster's is an open source project and users should be aware that any data entered can be overviewed by others in the DataMaster community. In addition, any datasets uploaded to our site will be analyzed only for improvement of our classifier algorithm.

How We Store Personal Information

Your personal information is stored on an AWS RDS PostgreSQL database. This database holds your personal information as well as the datasets you upload to classify. Security is of the utmost importance. AWS RDS PostgreSQL guarantees full encryption of your data, which prevents attacks on your personal information and data.

Marking Your Data As Confidential

For any file uploaded into a campaign, the DataMaster community has access in viewing it. Be aware that the data uploaded will be an open source example and the DataMaster community has the ability to download and redistribute it for their own purposes.

Notices And Revisions

As our business changes, so does our privacy policy. When updates to our software are made that change our privacy policy, notification emails will be sent. Please feel free to reach out to us with any questions or concerns about our privacy policy. Your safety is our highest value.
